<u>Notes for Windows Vista Users</u>

<u>Of FlexiPanel Products</u>

USB Installation

Our USB products use the `usbser.sys` driver which was shipped with previous versions of Windows, but not Windows Vista. To install FlexiPanel products, first copy the file `usbser.sys` in the development kit to the C:\Windows\System32\Drivers folder. Then ensure you specify the `.inf` file with the `– Vista` suffix, e.g. `USBoot – Vista.inf`.

HyperTerminal

Windows HyperTerminal is used by several of our evaluation guides. It is not shipped with Windows Vista but is available as *HyperTerminal Private Edition*, a free download from *www.hilgraeve.com*.
